Projects

#	Date	Project
1.	September 2020	**Todo App** A Todo app, short for "to-do" or "task management" app, is a software application that helps individuals and teams organize and manage their tasks and responsibilities. These apps are designed to improve productivity, prioritize tasks, set deadlines, and track progress. They provide a convenient way to create, update, and organize tasks digitally, eliminating the need for traditional pen-and-paper lists.
2.	December 2020	**Simple Calculator** A simple calculator is a device or program that performs basic arithmetic operations, such as addition, subtraction, multiplication, and division. It allows users to input numerical values and perform calculations to obtain the result.
3.	June 2021	**Delhi Monuments** A Delhi Monuments is a static historical website which displays all the available historic monuments which are present inside the Delhi. This is an informatic static website.
4.	December 2021	**Greenfield Cricket Academy** A Greenfield Cricket Academy is a static cricket academy website. All the information related to this cricket academy such as fee structure, about us, photos, terms & condition of the academy and admission are structured in this website. It is not a responsive website.
5.	August 2022	**Arcadius Master** Arcadius Master is a gaming website where the user can purchase any game they want to buy for their PlayStation or for desktop and Also, they can purchase antivirus and download open-source applications from this website.
6.	March 2023	**Electro Bazar** Electro Bazar, often referred to as an e-commerce shopping cart, is a software application or feature that enables customers to select and manage electronic products they wish to purchase from an online store. It simulates the experience of a physical shopping cart in a brick-and-mortar store, allowing users to collect items as they browse and proceed to checkout when ready to complete their purchase.
